

PEARL

Acrylic Distemper

Pearl ACRYLIC DISTEMPER gives a rich, smooth finish to your walls. PEARL ACRYLIC DISTEMPER is value for money paint. It provides durability and decoration to the walls at a very nominal cost.

FEATURES

- Good hiding power
- Very easy to use
- Very economical
- Provides great looks for your walls

WHERE IT CAN BE APPLIED

PEARL ACRYLIC DISTEMPER can be applied to all kinds of interior walls, ceilings, asbestos sheet etc.

RECOMMENDED APPLICATION

2 Coats for old walls and 3 coats for newly plastered walls.

SURFACE PREPARATION

In case of old painted walls, sand the walls with emery paper. Remove loose particles, and fill any dents or cracks with Shellcare putty. Allow it to dry and then apply Primecoat. In case of new plastered walls prime the surface by applying 2 coats of Primecoat.

HOW TO APPLY

Apply the 1st coat of PEARL ACRYLIC DISTEMPER by mixing it with water. Mix 1kg of Pearl acrylic distemper with adequate amount of water to achieve brushability, do not over dilute it. Allow it to dry for 6-8 hrs. Then apply the 2nd coat of Pearl acrylic distemper by mixing in the same ratio and again allow it to dry for 6-8 hrs. Stir thoroughly before using it.

PACKING

Available in 20 kg, 10 kg, 5 kg and 2 kg plastic tins.

ENVIRONMENT & SAFETY

Pearl acrylic distemper is environment friendly as it is non-toxic and non-flammable. It is hygienic as it does not pollute the air. Splashes of blossom in contact with skin should be immediately washed with water for easy removal. If it comes in contact with eyes wash thoroughly with plenty of water. If irritation persists, obtain medical help.
